This is the planned schedule; we will take any opportunity to compress the schedule so that events later in the day could shift earlier, but they can also shift later in the event of delays or technical issues.

Note that this is a large championship-level event, where things often move at a faster pace than at Qualifying Tournaments or other events. Teams are responsible for tracking the progress of the match schedule and appearing at judging, inspection, matches, and alliance selection in a timely manner.

\* Teams with later judging times should try to be finished with Robot Inspection and Field Inspection at least 15 minutes *before* their judging rounds, as there may be limited time (and long lines) for inspection after judging. However, it's more important to be on-time for judging.
